Chandra Sekhar

Attapur, Hyderabad, Telangana 500006
chandra06.tech@gmail.com
+919666342895

Senior Java Backend Developer with 5+ years of experience in designing, developing, and maintaining enterprise-grade backend applications using Java, Spring Boot, Microservices, and RESTful APIs across Banking, Insurance, and Retail domains. Experienced in building scalable backend services, integrating third-party APIs, troubleshooting production issues, and delivering high-quality software in Agile environments. Strong expertise in Java, Spring Framework, Spring Boot, Spring Security, Spring Data JPA, Hibernate, SQL, Docker, Kubernetes, AWS, and CI/CD. Passionate about Generative AI and currently expanding expertise in LangChain, LangGraph, RAG, LLMs, and Spring AI to build intelligent enterprise applications.

Willing to relocate to: Bengaluru, Karnataka - Chennai, Tamil Nadu - Hyderabad, Telangana

Work Experience

Sr. Associate Technology

Synechron-Bangalore, Karnataka
Full-time
July 2025 to May 2026

- Developed and enhanced enterprise-grade RESTful APIs using Java 8, Spring Boot, and Microservices.
- Designed and implemented backend business logic based on business requirements.
- Collaborated with cross-functional teams during requirement analysis, sprint planning, and Agile ceremonies.
- Performed code reviews and improved code quality using SonarQube.
- Investigated and resolved production issues by analysing application logs using Splunk.
- Developed and executed unit test cases using JUnit to ensure application reliability.
- Performed API validation and functional testing using Postman and JMeter.
- Supported CI/CD activities using Jenkins and TeamCity.
- Worked closely with QA, business analysts, and development teams to deliver high-quality software within sprint timelines.

Senior Analyst

Accenture-Hyderabad, Telangana
Full-time
August 2021 to September 2024

As a java developer, I have been involved for java related applications throughout the application development life cycle and involved for design, development, and maintenance of the application. Conducting software analysis, programming, testing, and debugging and ensuring application designs conform with business goals.

Associate Consultant

Virtusa-Hyderabad, Telangana
Full-time
December 2020 to August 2021

As a Java Developer, I was responsible for recommending improvements to enhance existing Java application processes, developing technical designs for new application features, and writing application code including XML-based programs. I actively supported the Development Manager in various technical

and project-related tasks as needed. Additionally, I was involved in designing user experience strategies by gathering UI requirements, analyzing user needs, and translating findings into effective and intuitive UI designs.

Software Engineer

BlueAlly Info Tech(India) Private Limited-Chennai, Tamil Nadu

Full-time

January 2020 to June 2020

As part of my role, I was involved in analyzing and modifying existing code and updating database queries based on project requirements. I actively identified and fixed bugs, reporting progress to the team lead. I participated in daily scrum meetings, regularly updating the Scrum Master on backlog progress. Additionally, I used Postman to test API endpoints, validate request flows, and adjust parameters as per client requirements to ensure accurate and efficient functionality.

Education
